

COMPETITIVE ANALYSIS

TRADIFY

Trading Discipline Platform

Your Rules. Enforced.

April 2026 | Confidential | v1.0

POSITIONING STATEMENT

For retail and prop firm traders who consistently break their own rules and blow accounts, Tradify is a trading discipline platform that enforces your trading rules in real-time through M15 integration, behavioral analysis, and AI-powered insights. Unlike TraderSync, Edgewonk, and TradeZella — which log trades after the fact — Tradify prevents bad trades before they happen.

TOP 3 STRATEGIC RECOMMENDATIONS

- %1. OWN THE "DISCIPLINE ENFORCEMENT" CATEGORY — No major competitor enforces rules in real-time. TraderSync and Edgewonk track violations after the fact. Position Tradify as the only journal that actually prevents bad trades, not just records them.
- %2. DOUBLE DOWN ON PROP FIRM TRADERS — TradeZella charges \$29-49/mo for basic prop firm tracking. Tradify's integrated Challenge Tracker with AI Risk Analysis is a stronger value prop. Target the 500K+ active prop firm challenge participants.
- %3. LEVERAGE THE FOUNDING MEMBER MOAT — At 16/500 founding members with lifetime 30% discounts, create urgency. Competitors have no equivalent loyalty program. This converts fence-sitters and builds a committed early user base.

COMPETITIVE LANDSCAPE

The trading journal market has 7 significant players. Most compete on analytics depth and broker integrations. None have built real-time rule enforcement — creating a clear category gap for Tradify.

COMPETITOR	EST.	PRICING	USERS	TOP STRENGTH	KEY WEAKNESS
TraderSync	2013	\$30-80/mo	N/A	AI coaching (Cypher)	No free tier, expensive
Edgewonk	2014	\$169/yr	N/A	Psychology tracking	No AI, no replay
TradeZella	2021	\$29-49/mo	N/A	Trade replay	No free trial, no refunds
TradesViz	2019	\$0-30/mo	100K+	Free tier (3K trades)	Overwhelming UX
Tradervue	2011	\$0-50/mo	207K+	Community/mentorship	Aging platform
TradeControl	2024	Freemium	New	Circuit breaker lockout	Very early stage
Trademetria	2016	\$0-30/mo	80K+	Gamified challenges	Limited AI features

FUNDING & MARKET CONTEXT

- % Most competitors are bootstrapped or lightly funded. No VC-backed market leader has emerged.
- % TraderSync is the most mature AI player (\$30-80/mo), but has no free tier — creating an opening.
- % TradeControl is the only competitor attempting discipline enforcement, but it's browser-only with local storage — no cloud sync, no MTS integration, very early stage.
- % The prop firm industry (FMO, TopStep, Funded Next) has 500K+ active challenge participants. No journal specifically targets this segment with integrated challenge tracking.

FEATURE COMPARISON MATRIX

Features weighted by buyer importance (prop firm & retail traders). Green = available, Red = missing, Amber = partial.

FEATURE (BY WEIGHT)	TRADIFY	TRADERSYNC	EDGEWONK	TRADEZELLA	TRADESVIZ	TRADERVUE
Rule Enforcement (real-time)	Green	Red	Red	Red	Red	Red
Strategy Builder + Validation	Green	Amber	Amber	Amber	Red	Red
MT5 Live Integration	Green	Amber	Amber	Red	Amber	Amber
Prop Firm Challenge Tracker	Green	Red	Amber	Amber	Red	Red
AI Trading Insights	Green	Green	Red	Red	Green	Red
AI Psychology Review	Green	Amber	Green	Red	Red	Red
Trade Journal	Green	Green	Green	Green	Green	Green
Equity Curve Analytics	Green	Green	Green	Green	Green	Green
Mood/Psychology Tracking	Green	Amber	Green	Red	Red	Red
Education System	Green	Red	Red	Red	Red	Red
Achievement/Gamification	Green	Red	Red	Red	Red	Red
Trade Replay	Red	Green	Red	Green	Green	Red
900+ Broker Imports	Red	Green	Amber	Red	Amber	Amber
Mobile App	Red	Green	Red	Red	Red	Amber
Community Features	Red	Red	Red	Amber	Red	Green
Free Tier	Green	Red	Red	Red	Green	Amber

KEY INSIGHT: Tradify wins on 10 of 16 features. The 3 gaps (trade replay, massive broker imports, mobile app) are future roadmap items. No competitor offers the combination of rule enforcement + prop firm tracking + AI insights + free tier.

PRICING COMPARISON & POSITIONING MAP

Tradify's tiered pricing (Free / Pro / Elite) is competitive. The Founding Member program (30% lifetime discount) creates urgency no competitor matches.

PLATFORM	FREE TIER	ENTRY PAID	MID TIER	TOP TIER	ANNUAL DISCOUNT
TRADIFY	Yes (full)	\$9.99/mo Pro	—	\$19.99/mo Elite	Founding: 30% off
TraderSync	No	\$29.95/mo	\$49.95/mo	\$79.95/mo	~35% annual
Edgewonk	No	\$169/yr flat	—	—	N/A (one tier)
TradeZella	No	\$29/mo	—	\$49/mo	17-32% annual
TradesViz	Yes (stocks)	\$19.99/mo	—	\$29.99/mo	25% annual
Tradervue	30 trades	\$29.95/mo	—	\$49.95/mo	10-20% annual
Trademetria	30 trades	\$19.95/mo	—	\$29.95/mo	~16% annual

POSITIONING MAP (2x2)

Tradify occupies the only position in the bottom-right quadrant: affordable AND enforcement-driven. TradeControl is nearby but lacks cloud infrastructure, AI, and M15 integration.

WHITE SPACE & OPPORTUNITIES

GAPS NO ONE SERVES WELL

% Real-Time Rule Enforcement

Every competitor logs violations after the trade. No one prevents bad trades before execution. Tradify's strategy validation engine is the only pre-trade enforcement mechanism in the market.

% Integrated Prop Firm Challenge Tracking

Prop firm traders juggle separate spreadsheets for challenge rules (max drawdown, daily loss limits, profit targets). No journal embeds this natively with AI risk analysis. TradeZella has basic support; Edgewonk can import from PTMO — but neither enforces challenge rules.

% Trader Education + Journaling

19-lesson education system with gamified progression doesn't exist anywhere else. Competitors assume traders already know how to trade. Tradify teaches AND tracks.

% Free Tier with AI Features

TradesViz offers the only meaningful free tier, but it's analytics-only (stocks). Tradify's free tier includes the full journal, strategies, and education — the AI features gate at Pro/Elite.

% Founding Member / Loyalty Programs

No competitor has a founding member program, early access benefits, or lifetime pricing. This creates switching costs and community that pure SaaS subscriptions don't.

KANO ANALYSIS — COMPETITOR FEATURES

CATEGORY	FEATURE	TODAY	IN 12 MONTHS
Basic (table stakes)	Trade journal & analytics	Table stakes	Still basic
Basic	Broker import / CSV upload	Expected	Commoditized
Performance	AI-powered insights	Differentiator	Becoming basic
Performance	Psychology/mood tracking	Differentiator	Becoming basic
Delighter	Real-time rule enforcement	Unique to Tradify	Category-defining
Delighter	Prop firm challenge tracker	Rare	Becoming performance
Delighter	Gamified education system	Unique to Tradify	Potential moat

ACTION PLAN & BATTLECARD

TOP 3 STRATEGIC ACTIONS

ACTION 1: Create the "Discipline Enforcement" Category

% Position all marketing around 'enforcement, not logging.' No competitor uses this language.
 % Every competitor says "track your trades" — Tradify should say "we stop you from breaking your rules."
 % Create comparison landing pages: Tradify vs TraderSync, Tradify vs Edgewonk, targeting '(competitor) alternative' search queries.
 % Source: TraderSync reviews mention wanting 'something that actually stops me' — this is unserved demand.

ACTION 2: Dominate the Prop Firm Segment

% 500K+ traders are active in prop firm challenges at any time. None have a dedicated tracking + enforcement tool.
 % Partner with prop firm affiliate programs (FTMO, TopStep, Funded Next) for cross-promotion.
 % Create targeted content: 'How to Pass Your FTMO Challenge with Tradify' — SEO landing pages for each major firm.
 % The free tier captures prop firm traders during their challenge; Pro/Elite converts them after they get funded.

ACTION 3: Accelerate the Founding Member Flywheel

% 16/500 slots filled. Create countdown urgency in all marketing: '484 founding spots remaining.'
 % Founding members at 30% lifetime discount become evangelists. Referral program amplifies this.
 % No competitor offers anything comparable — TraderSync's annual discount is temporary; Tradify's is permanent.
 % Target: Fill 100 founding spots in 90 days through X/Twitter content + prop firm community outreach.

BATTLECARD — TRAP-SETTING QUESTIONS

vs TraderSync

"Does your current journal actually prevent you from breaking rules, or does it just show you what happened after?" (TraderSync only logs — it doesn't enforce.)

vs Edgewonk

"What happens when you know your psychology is the problem but you still can't stop yourself from revenge trading?" (Edgewonk tracks mood — it doesn't lock you out.)

vs TradeZella

"Are you paying \$49/mo for a journal that can't even tell you if you're about to fail your prop firm challenge?" (TradeZella has no AI risk analysis for challenges.)

vs Spreadsheets

"How many hours a week do you spend manually updating your trading spreadsheet instead of actually trading?" (Most traders spend 3-5 hours — Tradify automates it with MT5 sync.)
